

Mohammed S. Zaineldeen

Full-Stack Engineer & R&D Specialist · Cybersecurity Master's Candidate

Turkey · mohammedszd99@gmail.com · github.com/MohammedSZD · linkedin.com/in/mohammad-zaineldeen

PROFILE

Full-stack software engineer with a foundation in cybersecurity, network security and secure application design. Experienced in architecting and shipping real systems end-to-end, including industrial management software, corporate and client websites, web applications, automation workflows and product platforms.

EXPERIENCE

Med-Mar Tuz San. Tic. A.Ş. — R&D Software Engineer February 2026 - Present

- End-to-end design and development of the company's corporate website.
- Major development on an internal Laravel-based factory management platform. Delivered core modules across 40+ database migrations and 15+ new views and interfaces during an eight-week sprint (May–June 2026).
- Designed and built a self-referencing industrial asset hierarchy — Factory → Unit → Section → Machine → Part → Sub-part — with dynamic, category-driven custom attributes, change and movement audit logging, and file/image attachments.
- Built maintenance work-order workflows linking jobs to machines, locations and personnel, with photo documentation, cost and spare-parts tracking, personnel assignment and search, and mobile-first reporting for factory staff.
- Built preventive-maintenance scheduling with daily, weekly, monthly, quarterly, biannual and annual recurrence, plus checklists and progress tracking, priorities and reminders, historical maintenance logs and reusable templates.
- Applied Laravel caching, Axios/AJAX asynchronous data fetching, mobile-first responsive interfaces and middleware-based role-based access control (RBAC).

Nur Plastic Company — Trading & Web Coordinator 2024 - January 2026

- Corporate website development and maintenance
- Digital identity, social media and content management
- Traffic and engagement analysis

Freelance — Front-End Development Editor / WordPress 2022 - Present

- WordPress websites
- Responsive design and UX improvements
- Ongoing maintenance

MAF Palestine Consultative — Front-End Development Editor 2023 - 2024

- Web performance and browser compatibility
- UI/UX implementation
- API integrations

Unit One Company — Web / Front-End Developer June 2021 - 2022

- Website development and backend functionality
- Legacy-code optimisation and debugging
- Responsive, accessibility-focused frontend implementation

TopFan League — Founder & Logistics Lead December 2023 - Present

- Football community operations: weekly matches and tournaments
- Venue reservations, team coordination and logistics
- Media production — a technology/platform relaunch is in development

SELECTED PROJECTS

Zain El Deen Store (E-commerce Storefront Showcase) — A bilingual (English / Arabic, RTL) storefront showcase for a family perfume and beauty shop — the 2026 modernization of my first complete website, built in 2020, with the original edition preserved alongside it. mohammedszd.github.io/zaineldeen-store-showcase/

Galaxs Team (Business Website) — A fast, dependency-free website for a software and design team in Istanbul: video hero, services, brand work and partners in a gold-on-black identity. mohammedszd.github.io/galaxy-site/

MEDMAR (Industrial Software / Internal Platform) — An internal Laravel platform that models a factory's physical assets and runs its maintenance operations — from asset hierarchy and work orders to preventive schedules and mobile reporting for floor staff.

Mini E-commerce (Web Application / Storefront Demo) — A responsive, frontend-only product catalog and product-management interface built with React, TypeScript and Tailwind CSS. mini-ecommerce-ruddy-five.vercel.app/

Restaurant Website (Business Website Concept) — A responsive single-page restaurant website with a filterable menu, an accessible photo lightbox and a validated reservation form — in plain HTML, CSS and JavaScript. mohammedszd.github.io/restaurant-site/

Shop Website (E-commerce Storefront Concept) — A responsive footwear storefront with search, filters, sorting, saved items and a details dialog — modernized from an early single-page learning project. mohammedszd.github.io/shop-site/

TECHNICAL SKILLS

Frontend	JavaScript, TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Sass, jQuery, Responsive UI, UI/UX implementation
Backend & APIs	PHP, Laravel, REST APIs, Axios, JWT, CRUD, JSON / CSV processing
Data	MySQL / SQL, PostgreSQL, MongoDB
AI & Automation	n8n, AI-assisted workflows, API integrations, Webhooks, Structured prompt engineering, Claude / GPT APIs, Scheduling integrations, CRM integrations
Development workflow	Git, GitHub, Vite, Postman, VS Code, Jira, Agile / Scrum
Quality assurance	Manual testing, Selenium WebDriver, SDLC / STLC, Test-case design, Bug reporting
Cybersecurity *	Network security, Threat analysis, OWASP Top 10, Nmap, Wireshark, Linux / Kali, Vulnerability assessment, Active Directory, TCP/IP, VLANs, Secure API design, eJPTv2 learning track
Also	Python, Java (OOP)

* currently developing

EDUCATION

M.S. Cybersecurity — Bahçeşehir University
2025 - Present · in progress

B.S. Software Engineering — Bahçeşehir University
2019 - 2023

CERTIFICATIONS

Graphic Design Certified — Development & Training Academy, 2024

ITIL 4 Foundation

Responsive Web Design — freeCodeCamp, 2023

Certified Web Designer (CWDSA) — HET Programming Academy, 2020
